PROFESSIONAL SUMMARY

Data Science Enthusiast with one year of hands-on experience through educational internships. Proficient in Python, SQL, and key data science libraries, including Pandas, NumPy, Matplotlib, Seaborn, with expertise in data visualization using Tableau. Experienced in managing end-to-end data science projects, encompassing data collection, preprocessing, analysis, and visualization. Strong foundation in machine learning for solving real-world challenges. Highly motivated to continuously learn and stay updated with emerging trends in data science

EDUCATION

Symbiosis Institute of Geoinformatics

M.Sc. Data Science and Spatial Analytics GPA: 7.85

Pune, India

2023-Present

Amro Institute of Management, Pune University

BScHS Percentage: 78.33

Nashik, India

2017-2020

TECHNICAL SKILLS

- **Programming Languages:** Python, R
- **Database Management:** SQL (MySQL, PostgreSQL, RDBMS), NoSQL (MongoDB)
- **Data Analysis & Visualization:** Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization, Statistical Analysis, Predictive Analytics, Data Manipulation, Data Wrangling, Dashboard Design
- **Core Competencies:** Machine Learning, Computer Vision, Image Processing, Deep Learning, Natural Language Processing (NLP), Data Quality & Governance, Cybersecurity
- **Libraries & Frameworks:** Scikit-learn, TensorFlow, Keras, NLTK, OpenCV, Gradio
- **Development Tools:** Git, GitHub, Jupyter, Google Colab, PyCharm, VSCode
- **Soft Skills:** Strong Reasoning, Decision Making, Team Collaboration, Time Management, Computer Literacy

WORK EXPERIENCE

Generative AI Intern || Nelumbus Technology

16 May, 2024 - 31 Jul, 2024

Skills: Python Programming, Text and PDF Processing, Question Answering System Development, Automated MCQ Generation

- Automated MCQ generation system, reducing manual effort by 80%, leveraging LLMs (Gemini Pro) & NLP techniques.
- Built an AI-powered chatbot for university queries, improving response efficiency by 70%, integrating Gradio & Gemini AI.

Data Science Consultant and Artificial Intelligence Expert Intern || Rubixe AI Solutions

08 Mar, 2022 - 24 Jan, 2023

Skills: Data Analysis, Machine Learning, Predictive Modeling, Statistical Data Analysis, Data Visualization, Deep Learning, Client Project Execution, Capstone Project Experience

- Worked on multiple capstone and client projects, leveraging data analysis, machine learning, and predictive modeling to develop data-driven solutions.
- Applied deep learning techniques and statistical data analysis to uncover trends, optimize workflows, and enhance decision-making. Gained hands-on experience in data visualization and project execution, ensuring efficient implementation of AI-driven strategies.

PROJECTS

1. Predicting Customer Lead Potential for Sales Optimization

- A machine learning model was built to predict the lead category of customers (High Potential, Low Potential) in order to optimize sales efforts.
- The model leveraged Logistic Regression, Decision Tree, Random Forest, Gradient Boosting, and XGBoost, with XGBoost achieving the best accuracy of 85.34%.

Project Link: <https://github.com/PawarMukesh/SalesForce-Effectiveness>

2. Utilizing Machine Learning to Enhance Employee Performance Evaluation

- A predictive model was developed to assess and enhance employee performance based on various work-related features.
- Several algorithms, including Random Forest, XGBoost, Logistic Regression, Decision Tree, and K-Nearest Neighbors, were utilized. The XGBoost model delivered the highest accuracy of 88.72%.

Project Link: <https://github.com/PawarMukesh/Employee-Performance-Analysis>

3. FIFA 20 Player Clustering: Unveiling Skill-Based Groups Using Machine Learning

- Applied K-Means Clustering to group players based on skill attributes, optimized using Elbow Method and Silhouette Score.
- Conducted Exploratory Data Analysis (EDA) to visualize player distributions by nationality, club, and position.
- Achieved Silhouette Score of 0.54, ensuring meaningful player groupings for performance insights.

Project Link: <https://github.com/PawarMukesh/Fifa20-Clustering>

4. Smart Malaria Detection: AI-Driven Microscopic Cell Classification

- Deep learning techniques, specifically VGG19 with transfer learning, were employed to detect and classify malaria-infected cells from microscopic images.
- The model achieved a remarkable accuracy of 92.17% on test data, aiding early diagnosis.
- Deployed the model using Flask, enabling real-time malaria detection through a user-friendly web interface.

Project Link: <https://github.com/PawarMukesh/MalariaCell-Detector>

5. Satellite-Based Land Cover Analysis: Feature Extraction and Classification

- This project focuses on classifying land cover types from satellite images using the EuroSAT dataset.
- A custom DCNN model with a VGG19 backbone was trained, achieving an accuracy of 88.5%.
- The model's performance was evaluated using metrics like precision, recall, and F1-score.

Project Link: <https://github.com/PawarMukesh/Satellite-Based-Land-Cover-Analysis-Feature-Extraction-and-Classification>

6. FlameShield: AI-Based Early Fire Detection System

- Developed a deep learning-based fire detection system using CNN to enhance real-time fire alerts.
- Trained on 4,416 images from Roboflow with data augmentation, achieving 94% training accuracy and 91% testing accuracy.
- Implemented a real-time alert mechanism for immediate fire notifications.

Project Link: <https://github.com/PawarMukesh/FlameShield-Smarter-System-for-Early-Fire-Alerts>

7. Visual Intelligence for Road Safety: Potholes Detection Using YoloV5

- Developed a pothole detection system using YOLOv5, achieving 92% training accuracy and 89% testing accuracy to enhance road safety.
- Utilized a dataset of 1,130 images from Roboflow, annotated with LabelImg and MakeSense.AI, and trained with an image size of 640, batch size of 12, and 100 epochs.
- Evaluated performance on test images and videos, ensuring robustness across different angles, lighting conditions, and real-world scenarios.

Project Link: <https://github.com/PawarMukesh/Pothole-Detection>

CERTIFICATION

- **Python Developer from NASSCOM in 2023**, demonstrating expertise in Python programming for software development and data analysis.
- **Artificial Intelligence Expert from IABAC in 2022**, specializing in AI techniques, machine learning models, and their real-world applications.
- **Certified Data Scientist from IABAC in 2022**, applying data science principles to drive data-driven decision-making.
- **Data Science Foundation from IABAC in 2022**, gaining a strong foundation in data analytics and statistical methodologies.
- **AI Expert from DataMites in 2022**, focusing on artificial intelligence algorithms, deep learning, and automation.
- **Certified Data Scientist from DataMites in 2022**, mastering key concepts in data science, machine learning, and predictive modeling.

ACHIEVEMENTS

- Late Smt, Laxmibai Sudames award for all-rounder of the year 2016-17
